GLOBAL IOT SOLUTION

Leader in Vehicle GPS Tracking & Video Recording Solution

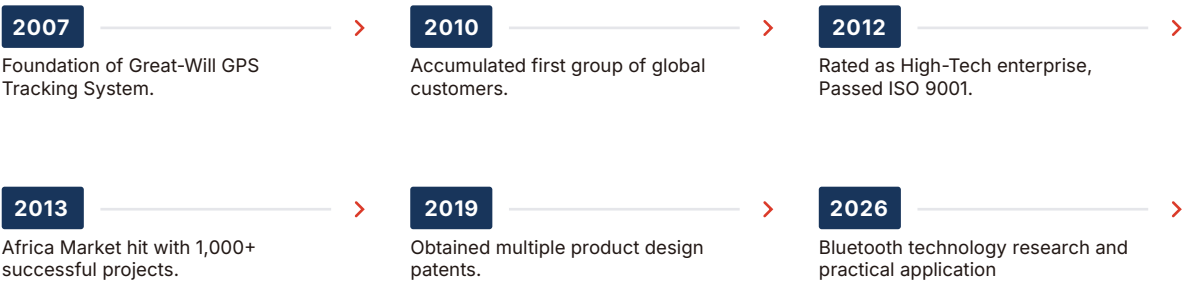

GREAT-WILL

PIONEERING IOT & TELEMATICS SINCE 2007

As a premier supplier of vehicle GPS tracking and video recording solutions, Great-Will (TARGESTAR) has been at the forefront of the IoT industry. We deliver end-to-end OEM, ODM, and platform software services, recognized globally for our integrity, innovation, and uncompromising quality.

MILESTONE

Bluetooth Wired GPS Tracker

GT21BT (4G) GT22BT (4G+2G)

Supports real-time positioning, track playback and multiple alarm auto financing vehicle tracking motorcycle functions. Among them, the most prominent ones are sudden acceleration, sudden deceleration and sudden braking alarms. Provide solid protection for your vehicle safety.

✓ KEY ADVANTAGES

Driver Identification

Identifies and records which driver is operating the vehicle.

Bluetooth Remote Engine Cut-Off

Using bluetooth with very low power consumption for wireless connection relay.

Wireless Fuel Sensor Monitoring

Fuel sensors that can be used without connection wires.

Driver Behaviour Alarm

Monitoring the driver with the harsh braking, harsh acceleration /deceleration.

Ignition Detection

Detects when the vehicle ignition is on or off.

Over Speed Alarm

Alerts when the vehicle exceeds a preset speed limit

> TECHNICAL SPECIFICATIONS

Network Frequency	B1/B2/B3/B4/B5/B7/B8/B20/B28/B66
Working Voltage	DC 9-90V
Location Accuracy	<2.5 m CEP
Working Temperature	-20°C ~ +70°C

Backup Battery	55mAh
Located Way	GPS+LBS+BDS
Dimensions	80*37*15mm
Storage Temperature	-40°C~+85°C

Advanced GPS Tracker

GT20PRO (4G+2G) GT20N (4G)

A variety of alarm functions (sudden acceleration, sudden deceleration, sudden braking alarms, etc.) can protect your vehicle safety. It is suitable for many scenarios such as auto finance, vehicle tracking, and motorcycle management.

✓ KEY ADVANTAGES

Waterproof IP65

Protected against dust and low-pressure water jets.

Vibration Alarm

Triggered when abnormal vibration is detected.

ACC Alarm

Notification when the ignition is turned on or off.

Blind Spot Storage

Provides signal even when driving in areas with weak signal.

Remote Engine Cut-Off

Allows the engine to be remotely disabled.

Real Time Tracking

Provides real-time location.

> TECHNICAL SPECIFICATIONS

Network Frequency	B1/B2/B3/B4/B5/B7/B8/B20/B28/B66
Working Voltage	DC 9-90V
Location Accuracy	<2.5 m CEP
Working Temperature	-20°C ~ +70°C

Backup Battery	100mAh
Located Way	GPS+LBS+BDS
Dimensions	76.5*32.6*13.9mm
Storage Temperature	-40°C ~ +85°C

Bluetooth Wired GPS Tracker

GT31BT (4G) GT32BT (4G+2G)

It is a 4G wired GPS tracker with stable real-time positioning. It supports various alarm types, including Bluetooth driver identification, driving behavior analysis, and collision warning. It safeguards your vehicle's safety in real time.

✓ KEY ADVANTAGES

- 
Driver Identification
Identifies and records which driver is operating the vehicle.
- 
Bluetooth Remote Engine Cut-Off
Using bluetooth with very low power consumption for wireless connection relay.
- 
Wireless Fuel Sensor Monitoring
Fuel sensors that can be used without connection wires.
- 
Driver Behaviour Alarm
Monitoring the driver with the harsh braking, harsh acceleration /deceleration.
- 
Ignition Detection
Detects when the vehicle ignition is on or off.
- 
Over Speed Alarm
Alerts when the vehicle exceeds a preset speed limit

> TECHNICAL SPECIFICATIONS

Network Frequency	B1/B2/B3/B4/B5/B7/B8/B20/B28/B66
Working Voltage	DC 9-90V
Location Accuracy	<2.5 m CEP
Working Temperature	-20°C~ +70°C

Backup Battery	100mAh
Located Way	GPS+LBS+BDS
Dimensions	78.8*33.2*13.8mm
Storage Temperature	-30°C~+80°C

Advanced Wired GPS Tracker

GT24H

Equipped with AT6558R chip, it has higher positioning auto financing vehicle tracking motorcycle accuracy. This product has real-time positioning, track playback and many alarm functions. Including overspeed alarm, vibration alarm, low battery alarm, etc. This product has become The best choice for customers with its extremely high safety.

✓

KEY ADVANTAGES

Waterproof IP65

Protected against dust and low-pressure water jets.

High Blind Storage

Up to 6000 data.

Remote Engine Cut-Off

Allows the engine to be remotely disabled.

Vibration Alarm

Triggered when abnormal vibration is detected.

ACC Alarm

Notification when the ignition is turned on or off.

Power Cut Alarm

Alerts when power is disconnected.

TECHNICAL SPECIFICATIONS

Network Frequency	B1/B2/B3/B4/B5/B7/B8/B20/B28/B66
Working Voltage	DC 9-90V
Location Accuracy	<2.5 m CEP
Working Temperature	-20°C~ +70°C

Backup Battery	55mAh
Located Way	GPS+LBS+BDS
Dimensions	80*37*15mm
Storage Temperature	-40°C~+85°C

Waterproof 8 Wired GPS Tracker

GT851

Adopts a waterproof design to ensure that the product remains reliable even in harsh environments. It supports panic button and in-car conversation monitoring in emergencies.

The product is ideal for stolen vehicle recovery, light vehicle management and other basic tracking applications.

KEY ADVANTAGES

Waterproof IP66

Dustproof and water-resistant up to 1 m.

Over Speed Alarm

Alerts when the vehicle exceeds a preset speed limit.

Remote Engine Cut-Off

Allows the engine to be remotely disabled.

Vibration Alarm

Triggered when abnormal vibration is detected.

SOS Function

Sends an emergency alert.

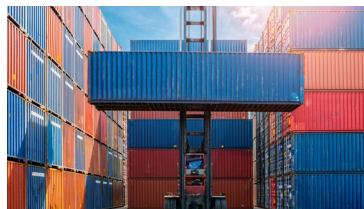

External Microphone

Voice monitoring.

TECHNICAL SPECIFICATIONS

Network Frequency	B1/B2/B3/B4/B5/B7/B8/B20/B28/B66	Backup Battery	80mAh
Working Voltage	DC 9-90V	Located Way	GPS+LBS+BDS
Location Accuracy	<2.5 m CEP	Dimensions	83*38*14mm
Working Temperature	-20°C~ +70°C	Storage Temperature	-40°C~+85°C

9 Wired Advance Wired GPS Tracker

GT25

The IP67-rated waterproof 4G+2G multi-function GPS tracker GT25 can support the connection fleet management cold supply chain long distance trucking of temperature and humidity sensors, fuel consumption sensors, card readers/printers, SOS button, buzzers and other peripherals to facilitate the correction of dangerous driving, behaviors of drivers.

✓ KEY ADVANTAGES

Waterproof IP67

Dustproof and water-resistant up to 1 m.

Bluetooth 5.1

Fast and stable wireless connection.

Remote Engine Cut-Off

Allows the engine to be remotely disabled.

Analog Input Interface

Connect analog load sensor.

Driver Behaviour Alarm

Monitoring the driver with the harsh braking, harsh acceleration / deceleration.

Anti-Interference

Stable performance with less signal interference.

> TECHNICAL SPECIFICATIONS

Network Frequency	B1/B2/B3/B4/B5/B7/B8/B20/B28/B66
Working Voltage	DC 9-90V
Location Accuracy	<2.5 m CEP
Working Temperature	-20°C~ +70°C

Backup Battery	300mAh
Located Way	GPS+LBS+BDS
Dimensions	88*38*17mm
Storage Temperature	-40°C~+85°C

iButton GPS Tracker

GT903K

4G wired GPS tracker equipped with RFID to identify authorized drivers, effectively protecting your vehicle from theft.

✓ KEY ADVANTAGES

iButton Clock In/Out

Driver check-in and check-out.

Over Speed Alarm

Alerts when the vehicle exceeds a preset speed limit.

Vibration Alarm

Triggered when abnormal vibration is detected.

Real Time Tracking

Provides real-time location.

Ignition Detection

Detects when the vehicle ignition is on or off.

Support Dual IP

Supports connecting to multiple servers.

TECHNICAL SPECIFICATIONS

Network Frequency	B1/B2/B3/B4/B5/B7/B8/B20/B28/B66
Working Voltage	DC 9-90V
Location Accuracy	<2.5 m CEP
Working Temperature	-20°C ~ +70°C

Backup Battery	300mAh
Located Way	GPS+LBS+BDS
Dimensions	78*34*16mm
Storage Temperature	-40°C~+85°C

Mini GPS Tracker

GT05N

The GT05N automotive tracker is a perfect solution for those who want to start their tracking anti-theft solution fleet management auto financing Center with a reduced initial cost.it is the most popular compact 4G model for basic real-time Tracking, historical route playback. Till now, 1,000,000 units deployed.

KEY ADVANTAGES

Dual IP Support

Connect to two servers to ensure stable data transmission.

Over Speed Alarm

Alerts when the vehicle exceeds a preset speed limit.

Remote Engine Cut-Off

Allows the engine to be remotely disabled.

Fuse Protection

A fuse to protect the device from overcurrent damage.

Ignition Detection

Detects when the vehicle ignition is on or off.

Driver Behaviour Alarm

Monitoring the driver with the harsh braking, harsh acceleration /deceleration.

TECHNICAL SPECIFICATIONS

Network Frequency	B1/B2/B3/B4/B5/B7/B8/B20/B28/B66
Working Voltage	DC 9-90V
Location Accuracy	<2.5 m CEP
Working Temperature	-20°C~ +70°C

Backup Battery	100mAh
Located Way	GPS+LBS+BDS
Dimensions	66*23*12.5mm
Storage Temperature	-40°C~+85°C

Wired GPS Tracker

GT23N

Stable 4G communication for real-time vehicle tracking. Suitable for financial leasing, vehicle management.

KEY ADVANTAGES

Real Time Tracking

Provides real-time location.

Waterproof IP65

Protected against dust and low-pressure water jets.

Vibration Alarm

Triggered when abnormal vibration is detected.

Over Speed Alarm

Alerts when the vehicle exceeds a preset speed limit.

SOS Function

Sends an emergency alert (option).

Remote Engine Cut-Off

Allows the engine to be remotely disabled (option).

TECHNICAL SPECIFICATIONS

Network Frequency	B1/B2/B3/B4/B5/B7/B8/B20/B28/B66
Working Voltage	DC 9-90V
Location Accuracy	<2.5 m CEP
Working Temperature	-20°C ~ +70°C

Standby Battery	27mA@12V (Static Current 5mA)
Located Way	GPS+LBS+BDS
Dimensions	80*27*9mm
Storage Temperature	-40°C~+85°C

Pure 4G Tracker

GT17

Compact and discreet, with multiple alarms to ensure vehicle safety. Ideal for various scenarios, including car rentals, logistics, and motorcycle management

KEY ADVANTAGES

 **Real Time Tracking**
Provides real-time location.

 **Geo-Fence Setting**
Allows you to set a virtual boundary.

 **Vibration Alarm**
Triggered when abnormal vibration is detected.

 **Over Speed Alarm**
Alerts when the vehicle exceeds a preset speed limit.

 **Remote Engine Cut-Off**
Allows the engine to be remotely disabled.

 **Low Battery Alarm**
Warns when battery is low.

TECHNICAL SPECIFICATIONS

Network Frequency	B1/B2/B3/B4/B5/B7/B8/B20/B28/B66
Working Voltage	DC 9-90V
Location Accuracy	<2.5 m CEP
Working Temperature	-20°C~ +75°C

Standby Battery	30mA@12V
Located Way	GPS+LBS+BDS
Dimensions	72*31*13mm
Storage Temperature	-30°C~+80°C

Advanced GPS Tracker

TR16

TR16 is a 2G vehicle positioning terminal supports real time tracking, historical playback, and has multiple & advanced alarms included harsh braking, sudden acceleration or sharp turning, overspeed alarms. Other customised alarms and features are available upon request

✓ KEY ADVANTAGES

Sharp Turning Alarm

Alerts on sudden sharp turns.

Harsh Braking Alarm

Alerts on sudden braking.

Remote Engine Cut-Off

Allows the engine to be remotely disabled.

Sudden Acceleration Alarm

Alerts on rapid acceleration.

Ignition Detection

Detects when the vehicle ignition is on or off.

Support 2 Servers

Can connect to two servers.

> TECHNICAL SPECIFICATIONS

Network Frequency 850/900/1800/1900MHz

Working Voltage DC 9-90V

Location Accuracy <2.5 m CEP

Working Temperature -20°C~ +70°C

Backup Battery 55mAh

Located Way GPS+LBS+BDS

Dimensions 74*30*13mm

Storage Temperature -40°C~+85°C

Wireless Asset GPS Tracker

GAT23

Magnet-mounted GAT23 gives detailed reports telling you exactly where the assets has been, where it's headed and whether it follow the routes you set. The internal mic allows for audio monitoring and voice recording of the environment. With a 5000 mAh battery and IPX5 waterproof rating, it puts your assets in total control.

KEY ADVANTAGES

Strong Magnet

Holds firmly to metal surfaces, free installation.

Demolition Alarm

Alerts if the device is tampered with or dismantled.

Real Time Tracking

Provides real-time location.

Geo-Fence Setting

Allows you to set a virtual boundary.

Vibration Alarm

Triggered when abnormal vibration is detected.

4 Work Modes

Supports different needs with 4 operation modes.

TECHNICAL SPECIFICATIONS

Network Frequency	B1/B2/B3/B4/B5/B7/B8/B20/B28/B66
Charging Voltage	DC 5V/1A
Location Accuracy	<2.5 m CEP
Working Temperature	-20°C~ +70°C

Working Current	80mA/4.2V
Located Way	GPS+LBS+BDS
Battery	5000mAh
Storage Temperature	-40°C~+85°C

Wireless Asset GPS Tracker

GAT33

Magnet-mounted GAT33 gives detailed reports telling you exactly where the assets has been, where it's headed and whether it follow the routes you set. With a 6800 mAh battery and IPX5 water-proof rating, Super standby king. It puts your assets in total control.

KEY ADVANTAGES

Strong Magnet

Holds firmly to metal surfaces, free installation.

Demolition Alarm

Alerts if the device is tampered with or dismantled.

Real Time Tracking

Provides real-time location.

Geo-Fence Setting

Allows you to set a virtual boundary.

Vibration Alarm

Triggered when abnormal vibration is detected.

4 Work Modes

Supports different needs with 4 operation modes.

TECHNICAL SPECIFICATIONS

Network Frequency	B1/B2/B3/B4/B5/B7/B8/B20/B28/B66
Charging Voltage	DC 5V/1.5A
Location Accuracy	<2.5 m CEP
Working Temperature	-20°C~ +70°C

Working Current	55mA/4.2V
Located Way	GPS+LBS+BDS
Battery	6800mAh
Storage Temperature	-40°C~+85°C

Wireless Asset GPS Tracker

GAT34

The GAT34 is a wireless GPS tracker with long battery life. Its large 6800mAh battery provides extended standby time, and it supports multiple operating modes and voice monitoring. It is ideal for asset tracking and fleet management.

✓ KEY ADVANTAGES

Ultra-long Battery Life

6800mAh battery provides long standby time.

4 Working Modes

4 working modes with intelligent switching.

Strong Magnet

Holds firmly to metal surfaces, free installation.

Light-Sensor

The device triggers an alarm when exposed to light.

Voice Monitoring

Built-in mic provides voice monitoring function.

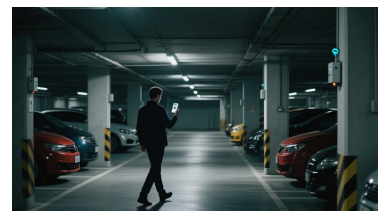

Vibration Alarm

Triggered when abnormal vibration is detected.

> TECHNICAL SPECIFICATIONS

Network Frequency	B1/B2/B3/B4/B5/B7/B8/B20/B28/B66
Charging Voltage	DC 5V/1.5A
Location Accuracy	<2.5 m CEP
Working Temperature	-20°C~ +70°C

Working Current	55mA/4.2V
Located Way	GPS+LBS+BDS
Battery	6800mAh
Storage Temperature	-40°C~+85°C

Wireless Asset GPS Tracker

GAT26

4G wireless GPS tracker with ultra-long standby time. It is widely used in asset monitoring and logistics transportation fleets. This product has an ultra-large capacity battery, which makes its battery life exceed 3 years in a specific working mode.

✓ KEY ADVANTAGES

3 Working Modes
Supports different needs with 3 operation modes.

Light Sensor Removal Alarm
Alerts if the device is removed or opened.

Strong Magnet
Holds firmly to metal surfaces, free installation.

Geo-Fence Setting
Allows you to set a virtual boundary.

Real Time Tracking
Provides real-time location.

Ultra-Long Battery Life
Up to 3 years.

> TECHNICAL SPECIFICATIONS

Network Frequency	B1/B2/B3/B4/B5/B7/B8/B20/B28/B66
Working Voltage	DC 3V
Location Accuracy	<2.5 m CEP
Working Temperature	-20°C ~ +70°C

Working Current	90mA
Located Way	GPS+LBS+BDS
Battery	4200mAh
Storage Temperature	-40°C ~ +85°C

Waterproof Wireless GPS Tracker

GAT24

4G full network vehicle positioning terminal specially built for the internet of vehicles. With ultra-low power consumption (online sleep mode: 800uA normal mode (timed reporting): 24mA) and IP67 high-level waterproof, multiple alarms and voice monitoring can well protect your property.

KEY ADVANTAGES

Ultra-low Power
Ensures longer device standby and efficient energy use.

Light Sensor
Detects light exposure and triggers an alert.

Waterproof IP67
Dustproof and water-resistant up to 1 m.

SOS Panic Button
Sends an emergency alert.

Strong Magnet
Holds firmly to metal surfaces, free installation.

Big Battery
Standby time up to 170 days.

TECHNICAL SPECIFICATIONS

Network Frequency	B1/B2/B3/B4/B5/B7/B8/B20/B28/B34/B38/B39/B40/B41/B66
Charging Voltage	DC 5V/2A
Location Accuracy	<2.5 m CEP
Working Temperature	-20°C~ +75°C

Working Current	24mA
Located Way	GPS+LBS+BDS
Dimensions	95*72*35mm
Battery	7500mAh
Temperature	-20°C~+75°C

Mini Wireless GPS Tracker

GAT27

Using low-power communication module, charging for 2 hours and standby for 30 days, it is suitable for many scenarios such as vehicle rental, logistics cargo, and corporate bus management.

✓

KEY ADVANTAGES

Ultra-Low Power

Ensures longer device standby and efficient energy use.

Compact Size

Small and easy to carry.

Equipped With Switch Button

Has an on/off button.

Type-C Charging

Quickly charging design.

Waterproof IP65

Protected against dust and low-pressure water jets.

Vibration Alarm

Triggered when abnormal vibration is detected.

Asset GPS Tracker

GAT12

Ultra-long standby positioning terminal based on 4G communication, with a built-in 9600mAh lithium manganese battery, which can work continuously for 6 years with one positioning per day, the built-in magnet design and IP67 waterproofing of the whole machine are conducive to the adaptation of multi-scenario applications

KEY ADVANTAGES

Long Standby Time
9600 mAh up to 6 years.

Ultra-Low Power Consumption
Ensures longer device standby and efficient energy use.

Light Sensor Removal Alarm
Alerts if the device is removed or opened.

Low Battery Alarm
Warns when battery is low.

Non-Rechargeable
Battery cannot be recharged.

Waterproof IP67
Dustproof and water-resistant up to 1 m.

TECHNICAL SPECIFICATIONS

Network Frequency	B1/B2/B3/B4/B5/B7/B8/B20/B28/B66
Working Voltage	DC 3V
Location Accuracy	<2.5 m CEP
Working Temperature	-20°C~ +70°C

Working Current	50mA
Located Way	GPS+LBS+BDS
Battery	9600mAh
Storage Temperature	-40°C~+85°C

OBD GPS Tracker

GTB10

Plug-and-play solution suitable for numerous uses, including fleet management, insurance telematics, car rental and leasing, and more. Ultra-small size design will fit in the tightest spaces of any vehicle

✓ KEY ADVANTAGES

Plug And Play

Works immediately when connected.

Voice Monitoring

Listens to surroundings remotely.

Real Time Tracking

Provides real-time location.

Geo-Fence Setting

Allows you to set a virtual boundary.

Vibration Alarm

Alerts when the device is shaken.

Disconnection Alarm

Alerts if the device is disconnected.

> TECHNICAL SPECIFICATIONS

Network Frequency	B1/B2/B3/B4/B5/B7/B8/B20/B28/B66
Working Voltage	DC 9-36V
Location Accuracy	<2.5 m CEP
Working Temperature	-20°C~ +70°C

Working Current	25mA@12V (Static Current 3mA)
Located Way	GPS+LBS+BDS
Dimensions	51*31*29mm
Storage Temperature	-40°C~+85°C

Pet 4G GPS Tracker

GTP11

IP67 waterproof rating, allowing pets to play in the water without worries. It also has Bluetooth, light, and sound, multiple pet-finding methods to accurately locate your pet

KEY ADVANTAGES

Waterproof IP67

Dustproof and water-resistant up to 1 m.

Easy Pet Finding

Helps locate pets using bluetooth, light, and sound.

Smart Power Saving

Saves battery automatically.

Real Time Tracking

Provides real-time location.

Geo-Fence Setting

Allows you to set a virtual boundary.

Assisted Positioning

Helps the device get a stronger and faster location signal.

TECHNICAL SPECIFICATIONS

Network Frequency	B1/B2/B3/B4/B5/B7/B8/B20/B28/B66
Charging Voltage	5V/0.4 A
Location Accuracy	<2.5 m CEP
Working Temperature	-20°C~ +75°C

Working Current	20mA@4V
Located Way	GPS+LBS+BDS
Dimensions	64*34*23mm
Storage Temperature	-20°C~+85°C

IP68 Waterproof Wireless BT Smart Tracker

SPACE17

✓ KEY ADVANTAGES

 **Tracking In IOS/Android**
View location on iphone or android.

 **No SIM Card**
Not need SIM card internet.

 **Anti-Jamming**
Prevents signal interference from jammers.

 **Waterproof IP68**
Dustproof and can be submerged in water over 1 m.

Wireless Paper BT Smart Tracker

SPACEPAPER

✓ KEY ADVANTAGES

 **Super Thin Design**
Thin as a paper.

 **Tracking In IOS/Android**
View location on iphone or android.

 **No SIM Card**
Not need SIM card internet.

 **Anti-Jamming**
Prevents signal interference from jammers.

Wired BT Smart Tracker

SPACELINE

✓ KEY ADVANTAGES

 **Easy Hidden**
The device is extremely easy to hide.

 **Anti-Jamming**
Prevents signal interference from jammers.

 **Tracking In IOS/Android**
View location on iphone or android.

 **No SIM Card**
Not need SIM card internet.

2-4 CH (ADAS+DMS) FHD 1080P Dashcam

GD14

The GD14 is a dashcam with remote monitoring capabilities, supporting up to 1080P resolution, real-time location tracking, and video playback. ADAS+DMS safeguards driving safety and regulates driver behavior. Multiple alarms protect asset security.

✓ KEY ADVANTAGES

Video Live Stream
Provides real-time location and real-time video monitoring.

Parking Monitoring
24-hour monitoring to ensure vehicle safety.

4G+WIFI Network
Supports 4G remote communication and monitoring.

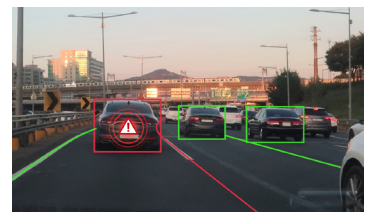

9-36V Wide Voltage Range
Wide voltage range, can be used in any vehicle.

ADAS&DMS
Driving behavior detection to protect driving safety.

Collision Alarm
Preserve evidence of the accident and receive alarms remotely.

> TECHNICAL SPECIFICATIONS

Module	Quectel EC200 series	Positioning Method	GPS+BDS+LBS
Video Format	H.264/H.265	Camera Resolution	1080P
Front Cam Angle	D:125° H:105° V:58°	Interior Cam Angle	D:120°H:100°V:45°
Support Storage	512GB SD Card	Operating System	Linux
Host Size	116*66*38mm	Host N.W.	≈198g
Working Voltage	DC 9-36V	Camera Channels	Max 4CH

2 CH (ADAS+DMS) FHD 720P Dashcam

GD14N

The GD14N is a dashcam with remote monitoring capabilities, featuring 1080P+720P cameras. Support real-time location tracking, and video playback. ADAS+DMS safeguards driving safety and regulates driver behavior. Multiple alarms protect asset security.

✓ KEY ADVANTAGES

Video Live Stream

Provides real-time location and real-time video monitoring.

Easy Installation

Built-in antenna, easy to install.

4G+WIFI Network

Supports 4G remote communication and monitoring.

9-36V Wide Voltage Range

Wide voltage range, can be used in any vehicle.

ADAS&DMS

Driving behavior detection to protect driving safety.

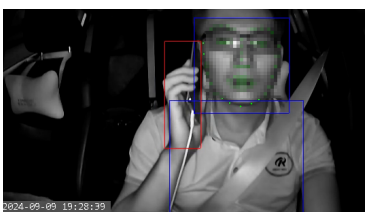

Collision Alarm

Preserve evidence of the accident and receive alarms remotely.

> TECHNICAL SPECIFICATIONS

Module	Quectel EG800K series	Positioning Method	GPS+BDS
Video Format	H.264/H.265	Camera Resolution	720P
Front Cam Angle	D:125° H:105° V:58°	Interior Cam Angle	D:120°H:100°V:45°
Support Storage	512GB SD Card	Operating System	Linux
Host Size	116*66*38mm	Host N.W.	≈158g
Working Voltage	DC 9-36V	Operating Temperature	-20°C~70°C

2-3 CH (ADAS+DMS) FHD 2K Dashcam

GD301

The GD301 is a 3-channel, independent camera dashcam that supports remote viewing of real-time positioning, real-time video, ADAS, DMS, and BSD functions. It is a comprehensive dashcam designed specifically for fleet management.

✓ KEY ADVANTAGES

512GB TF Card Storage

Supports up to 512GB TF card storage.

Remote Fuel And Power Cut-Off

Remote control vehicle.

2K High Definition

High-definition image display.

Farad Capacitors

Support power failure alarm and provide 10-second video.

ADAS&DMS

Driving behavior detection to protect driving safety.

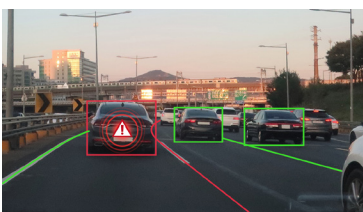

BSD Detection

Avoiding blind spot collisions.

> TECHNICAL SPECIFICATIONS

Module	Quectel EC200 series	Positioning Method	GPS+BDS+LBS
Video Format	H.264/H.265	Camera Resolution	2K+1080P
Front Cam Angle	D:128° H:108° V:63°	Operating System	Linux
Support Storage	512GB SD Card	Host N.W.	≈200g
Host Size	100*80*35mm	Operating Temperature	-20°C~70°C
Working Voltage	DC 9-36V		

2CH FHD 2K+1080P Dashcam

GD17

GD17 is a 4G 2K+1080P dual camera dashcam that supports real-time satellite positioning and real-time video recording. Video and alarm data can be uploaded remotely to solve the vehicle anti-theft, anti-scratch collision, the occurrence of the above accident, the first time to report to the platform and the owner.

✓

KEY ADVANTAGES

4G Remote Live

Store alarm videos to prevent loss.

SOS Alarm Panic Button

Short press SOS button, capture images.

Parking Monitoring

Recording and preserve a 20s video when detect vibration in parking.

Recording Loops

Auto cover the stored video when TF card is full.

3-Inch Screen

Live streaming and replay videos.

Collision Alarm

Preserve evidence of the accident and receive alarms remotely.

>

2CH FHD 2K+1080P Dashcam

GD101N

GD101N is a 4G 2K+1080P dual camera dashcam that supports real-time satellite positioning and real-time video recording. Video and alarm data can be uploaded remotely to solve the vehicle anti-theft, anti-scratch collision, the occurrence of the above accident, the first time to report to the platform and the owner.

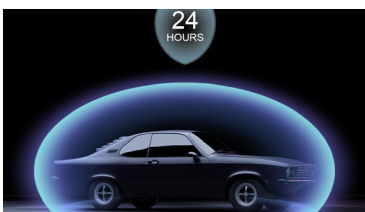

✓ KEY ADVANTAGES

- 
4G Remote Live
 Supports 4G remote communication and monitoring.
- 
Collision Alarm
 Preserve evidence of the accident and receive alarms remotely.
- 
Parking Monitoring
 Recording and preserve a 20s video when detect vibration in parking.
- 
Recording Loops
 Auto cover the stored video when TF card is full.
- 
Sentry Mode
 Saves video evidence when pedestrians or vehicles approach.
- 
Free App
 Free remote monitoring App.

> TECHNICAL SPECIFICATIONS

Module	AL30G810	Positioning Method	GPS+BDS
Video Format	H.264/H.265	Camera Resolution	2K+1080P
Control Mode	APP+Platform	Operating System	Linux
Support Storage	512GB SD Card	Support	4G Full Network
Host Size	65.28*87.41*38.84mm	Host N.W.	≈198g
Working Voltage	DC 12-24V	Operating Temperature	-20°C~70°C

2CH FHD 1080P Dashcam

GD09

GD09 is a 4G free mobile APP real time tracking vehicle dashcam. Video and alarm data can be uploaded remotely to solve the vehicle anti-theft, anti-scratch collision, the occurrence of the above accident, the first time to report to the platform and the owner.

✓ KEY ADVANTAGES

4G Network
Supports 4G remote communication and monitoring.

Collision alarm
Preserve evidence of the accident and receive alarms remotely.

Parking Monitoring
Recording and preserve a 20s video when detect vibration in parking.

Time-lapse Recording
Auto cover the stored video when TF card is full.

Type-C
Type-C power cable,support ACC/Ignition detection.

GPS + BDS
Supports GPS + BDS dual-mode positioning.

> TECHNICAL SPECIFICATIONS

Module	EG800K and L511EN	Positioning Method	GPS+BDS
Video Format	H.264	Camera Resolution	1080P
Control Mode	APP	Operating System	Linux
Support Storage	256GB SD Card	Support	4G Full Network
Working Voltage	DC12V±5%	Operating Temperature	-10°C~+70°C

2CH Dashcam Mini Hidden Driving

GD02

GD02 supports real-time satellite positioning and real-time video recording. Video and alarm data can be remotely uploaded to address vehicle theft, vandalism, and collisions, reporting the incidents to the platform and the vehicle owner immediately.

✓ KEY ADVANTAGES

4G Network
Supports 4G remote communication and monitoring.

Collision Alarm
Preserve evidence of the accident and receive alarms remotely.

Parking Monitoring
Recording and preserve a 20s video when detect vibration in parking.

Recording Loops
Auto cover the stored video when TF card is full.

ACC/Ignition Detection
Starts recording when ACC ON.

Free APP
Free remote monitoring platform.

> TECHNICAL SPECIFICATIONS

Module	EC800AK	Positioning Method	GPS+BDS
Video Format	H.264	Camera Resolution	1080P+720P
Control Mode	APP+Platform	Operating System	Linux
Support Storage	512GB TF Card	Support	4G Full Network
Host Size	65.28mm*87.41mm*38.84mm	Host N.W.	≈118g
Working Voltage	DC 9-36V	Operating Temperature	-20°C~70°C

5CH Driving Assistance System

GD510

The GD510 is a comprehensive automotive active safety product that integrates satellite positioning, video monitoring, and active safety functions into a single display screen. This product meets the needs of fleet monitoring, production operation management, command and dispatch, driving safety, and standardized driving behavior.

✓ KEY ADVANTAGES

4G+WIFI Network
Supports 4G remote communication and monitoring.

Collision Alarm
Preserve evidence of the accident and receive alarms remotely.

Touchscreen Functionality
A 10.1-inch ultra-large display screen shows the live broadcast.

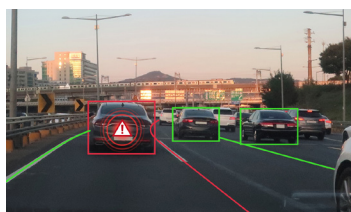

Max 5 CH
Supports simultaneous playback of up to 5 video channels.

ADAS&DMS
Driving behavior detection to protect driving safety.

BSD Detection
Avoiding blind spot collision.

> TECHNICAL SPECIFICATIONS

Module	CLM920_JC3F	Positioning Method	GPS+BDS
Video Format	H.264	Camera Resolution	1080P
Front Cam Angle	D:128° H:108° V:63°	Operating System	Linux
Support Storage	512GB SD Card	Screen	10.1 inch
Host Size	250*170*30mm	Host N.W.	≈200g
Working Voltage	DC 9-36V	Operating Temperature	-20°C~70°C

GALAGPS

ADVANCED FLEET & ASSET MANAGEMENT

Galagps telematics cloud platform is a cloud-based solution with a complete set of services designed for remote device management, fleet tracking, asset tracking, and diverse vertical applications. As an off-the-shelf turnkey solution, galagps is secure, open, and scalable, playing an essential role in enabling visibility, simplifying management, and optimizing resource utilization.

WHY CHOOSE OUR IOT SIM

Easy Activation
Set our APN in the device and go. Plug and play simplicity.

Low Rate Data
Cost-effective plans tailored for IoT and M2M communications.

Universal Compatibility
Works seamlessly with any unlocked GSM & 4G LTE device.

Dedicated Network
Cellular network built specifically for IoT reliability.

TRIPLE-CUT FORM FACTOR

Our SIM cards are Triple-Cut to fit a variety of devices. Each card can be easily adjusted from **Standard (2FF)**, to **Micro (3FF)**, and **Nano (4FF)** sizes. Industrial-grade SIM cards are also available upon request.

SIM FOR ANY DEVICES

Whether it's Alarm Systems, Smart Watches, GPS Trackers or any other IoT device, we've got you covered.
